

MACHINERY & MANUFACTURING

The Sustainable Hybrid Manufacturing Magazine
for Production Engineers, that fits inside a tablet case!

HIGHLIGHTING MACHINE TOOL &
MANUFACTURING TECHNOLOGY

An Introduction

In the technology driven, post pandemic business environment, building your brand and promoting to your products has never been more important. It is quite simple really, if you want to influence your customers buying decisions, they need to see you. We've got that covered.

Machinery & Manufacturing magazine is crafted specifically for production engineers and directors within UK machine tool intensive manufacturing sites.

This disruptive A5 format promises to deliver a desirable interactive reader experience whilst supporting a greener planet. In turn we can offer competitive advertising rates to our customers.

Our partnership with the carbon offsetting organisation **more:trees**[®] allows us to ensure we are doing our bit whilst satisfying the appetite for machine tool technology and manufacturing knowledge within the production engineering community.

Sawing Machine Tool Technology 5-Axis Turning
Subcontracting Surface Finishing
CAD/CAM Coolants **Grinding** Precision Robotics
Manufacturing Industry 4.0 Honing
Profiling Aerospace **Medical**
Lasercutting **Transport Tooling Milling**

About

Engineering Media Ltd is a small yet strong-minded business which was formed in 2021 to provide a transparent advertising platform for the engineering community, whilst supporting a green environment.

Our People

With over 50 years experience within the world of engineering, marketing, publishing and media - You are in capable hands! Drawing on expertise to create our team has been paramount. We may be small but we are mighty.

Our Values

Passion

Flair for media and passion for UK Manufacturing is at the very soul of our operation.

Boldness

We seek to be bold

Trust

To provide a trusted and personal service, the kind where you're confident that we are doing everything in our power to support your strategy for growth.

Accountability

To provide clear statistics back to our advertisers and to become carbon neutral by 2030

Our Data

They say 'Data is gold'. It's true. But of course not everybody loves data in the same way that people love gold in all its regal glory, yet somehow the analogy fits. Similar to gold, data isn't simply valuable in its raw state. To obtain value from your gold, it first needs processing, to be minted into coins or worked into a piece of jewellery. Data is essentially valueless when collected in isolation.

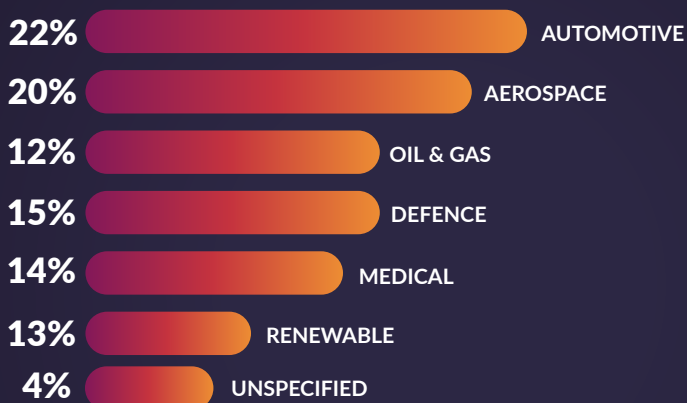

We do not just collect data, we work it into something much more valuable. Our magazine circulation is continually updated to ensure that our customer reaches the right people in order to drive business profit.

Magazine Circulation

Machinery & Manufacturing magazine is distributed in a disruptive eco-friendly A5 format to approximately 13,000 production engineers, engineers, management and directors within UK machine tool intensive manufacturing sites.
